

AI Agent Factory

agentfactory.panaversity.org — Scenario-Based Assessment

PREPARED FOR
Imran Hassan

Total Questions: 25 Marks Each: 4 Total Marks: 100 Difficulty: Intermediate

Date: June 2026

Instructions: Each question presents a real-world scenario. Read carefully and select the *best* answer. Correct answers are marked with a green border. The Answer Key is provided at the end.

SECTION A — CORE CONCEPTS & DEFINITIONS

1

SCENARIO

Sara is a startup founder. She wants to replace repetitive knowledge work in her company with AI systems that work continuously, follow clear specifications, and can be audited. Which term best describes what Sara is trying to build?

- A General-purpose chatbots like ChatGPT
- B Digital FTEs (Full-Time Equivalent AI Workers)**
- C Large Language Models (LLMs)
- D Robotic Process Automation (RPA) scripts

2

SCENARIO

Ahmed asks his AI assistant to "help me write an email" and gets the job done himself. This is different from deploying an agent that independently handles all company emails 24/7. Which category does Ahmed's usage fall under?

- A Digital FTE deployment
- B Mode 2 — Building autonomous agents
- C Mode 1 — Using AI to accelerate personal work**
- D AI-Native Company operation

3

SCENARIO

A company has only 5 human employees but uses 50 AI agents to handle customer support, finance reporting, and marketing. This business model is best described as:

- A A traditional enterprise with automation tools
- B An AI-Native Company**
- C A BPO (Business Process Outsourcing) firm
- D A SaaS company with chatbot support

4

SCENARIO

Usman is studying the AI Agent Factory book and wants to understand where "building AI applications" fits in the larger technology stack. According to Jensen Huang's Five-Layer AI Model, at which layer does building Digital FTEs occur?

A Energy Layer

B Chips Layer

C Models Layer

D Applications Layer

5

SCENARIO

A Digital FTE deployed at a law firm consistently produces different outputs for the same legal query, and no one can trace why. Which of the four critical elements is most likely missing?

A Domain Expertise

B Structured Specifications

C Engineering Architecture

D Human Oversight

SECTION B — LEARNING PATHS & TARGET AUDIENCES

6

SCENARIO

Fatima is a marketing manager who wants to use AI to finish her own reports faster — she does NOT want to build autonomous agents. Which rung of the AI Agent Factory learning ladder should she focus on?

- A** Foundations only (Markdown & prompting)
- B** Foundations + Mode 1
- C** Mode 2 — Building Digital FTEs
- D** Deep Dive Chapters on Engineering Architecture

7

SCENARIO

A hospital CTO wants to deploy AI agents across all departments and needs to understand governance, compliance, and deployment strategies at scale. Which target audience best matches this person?

- A** AI Developer / Engineer
- B** Domain Expert / Professional
- C** Enterprise Executive
- D** Department Leader

8

SCENARIO

Dr. Khalid is a cardiologist who wants to convert his 20 years of clinical knowledge into reusable AI skills that agents can use when diagnosing patients. Which audience category does Dr. Khalid belong to?

- A Enterprise Executive
- B Domain Expert / Professional**
- C Product Manager / Architect
- D AI Developer / Engineer

9

SCENARIO

Bilal is a product manager who must translate business requirements like "reduce customer churn by 20%" into AI agent systems. Which target audience best fits his role in the AI Agent Factory framework?

- A Enterprise Executive
- B Department Leader
- C Product Manager / Architect**
- D Domain Expert / Professional

10

SCENARIO

A student wants to quickly gain 80% of the practical skills needed for daily agentic work without reading hundreds of pages. Which content type in the AI Agent Factory book is best suited for this?

- A Crash Courses**
- B Deep Dive Chapters

C Derivative Books

D TutorClaw AI tutor sessions

SECTION C — TOOLS, CHANNELS & ARCHITECTURE

11

SCENARIO

A remote student in a rural area with limited internet access needs help understanding the AI Agent Factory content at 2 AM. Which delivery channel is specifically designed to provide 24/7 help in this situation?

A The Book (canonical source)

B TutorClaw (WhatsApp / Telegram / web)

C Agent Factory Skillpack

D Derivative Books

12

SCENARIO

A development team is building a high-stakes, production-critical AI agent for a bank. They need the most powerful and capable agentic coding environment. Which tool does the AI Agent Factory recommend for this use case?

A Claude Code (frontier-first approach)

B OpenCode (open-source, model-agnostic)

C ChatGPT API with custom plugins

D TutorClaw advanced mode

13

SCENARIO

A startup wants to build AI agents but needs flexibility to switch between different AI model providers (like Gemini, Mistral, or local models) to control costs. Which tool is most appropriate?

A Claude Code only

B OpenCode (open-source, model-agnostic)

C The Book's Crash Course section

D Derivative Books

14

SCENARIO

A team finishes building a Digital FTE using Claude Code. They later switch to OpenCode. They are surprised to find the architectural patterns are the same. What principle of the AI Agent Factory does this demonstrate?

A Vendor lock-in strategy

B Five-Layer AI Model integration

C Tool portability — the discipline remains portable across tools

D System of Record consistency

15

SCENARIO

A publisher wants to create a specialized version of the AI Agent Factory content for healthcare professionals only. According to the four delivery channels, which channel supports this?

- A TutorClaw
- B Agent Factory Skillpack
- C The Book (canonical source)
- D Derivative Books (specialized editions by topic and audience)

SECTION D — SYSTEM OF RECORD & SPECIFICATIONS

16

SCENARIO

A company's AI learning program is scattered across 50 YouTube videos, 10 blogs, and 3 online courses. Learners keep getting conflicting information. The AI Agent Factory proposes solving this with:

- A Hiring more instructors
- B Using only ChatGPT for answers
- C A System of Record — a verified, single authoritative knowledge base
- D Creating more YouTube content

17

SCENARIO

When the AI Agent Factory book is updated with new agentic patterns, the change must automatically reflect in TutorClaw, the Skillpack, and

Derivative Books without manual updates to each. Which property of the System of Record enables this?

- A** Five-Layer Model compliance
- B** Mode 2 autonomy
- C** Updates propagate across all delivery channels simultaneously
- D** Human oversight feedback loops

18

SCENARIO

An AI agent at a financial firm keeps making errors because it "hallucinates" wrong procedures. The solution proposed by the AI Agent Factory is to ensure the agent references verified patterns. This is the core benefit of which concept?

- A** Mode 1 learning path
- B** Digital FTE certification
- C** System of Record — ensures AI references verified knowledge, not probabilistic generation
- D** Jensen Huang's Five-Layer Model

19

SCENARIO

A healthcare AI agent makes decisions that cannot be traced or reviewed by any human. A patient files a complaint, but the hospital cannot explain what happened. Which of the four critical elements of a Digital FTE was neglected?

- A Structured Specifications
- B Domain Expertise
- C Engineering Architecture
- D Human Oversight (feedback loops maintaining accountability)**

20

SCENARIO

A new AI agent handles customer refund requests but lacks knowledge of the company's refund policy, legal constraints, and industry standards. It keeps making wrong decisions. Which critical element is clearly missing?

- A Human Oversight
- B Domain Expertise**
- C Structured Specifications
- D Engineering Architecture

SECTION E — ECONOMICS, VISION & APPLICATION

21

SCENARIO

A solo founder launches a telehealth platform. Within one year, the platform earns hundreds of millions in revenue with minimal human staff — powered entirely by AI agents. This real-world example is used in the AI Agent Factory to illustrate which concept?

- A Mode 1 personal productivity gains**

B The importance of Deep Dive Chapters

C The economic vision of AI-Native Companies with high leverage and minimal headcount

D The Five-Layer AI model's chip infrastructure

22

SCENARIO

Zara has been curious about AI for two years but has never built anything or deployed any agent in her business. The AI Agent Factory's core promise to people like Zara is to help them move from:

A Beginner models to expert LLMs

B ChatGPT to Claude

C AI curiosity to operational execution where expertise becomes repeatable and economically meaningful

D Foundations to Deep Dive chapters

23

SCENARIO

An e-commerce company's AI agent handles shipping, returns, and inventory — but it crashes every peak season because its infrastructure can't handle load. Which of the four critical elements of a Digital FTE is weak?

A Domain Expertise

B Human Oversight

C Structured Specifications

D Engineering Architecture (reliability and scalability)

24

SCENARIO

A reader finished the Foundations and Mode 1 sections of the AI Agent Factory book and feels highly productive. The book suggests that for most readers, substantial value is gained at this point. What does this imply about Mode 2?

A Mode 2 is the minimum requirement for all learners

B Mode 2 is only for enterprise executives

C Mode 2 (building autonomous Digital FTEs) is advanced and optional — most readers don't need it

D Mode 2 is covered only in Derivative Books

25

SCENARIO

A student needs to go deep into a specific topic — like "prompt engineering for financial analysis agents" — and wants comprehensive, authoritative reference material. Which content type should they use?

A Crash Courses

B TutorClaw quick-answer mode

C Deep Dive Chapters (comprehensive reference material)

D Mode 1 foundations only
