Part 1 — The Two Upgrades: Skills & Connectors (Q1–Q12)

SCENARIO

Sarah is a marketing manager who pastes her brand voice guidelines into every single chat with Claude. She does this every day, multiple times a day, wasting 10 minutes each session.

- 1 Which feature would BEST solve Sarah's problem of repeatedly explaining her brand voice rules?

A A Connector to her email app

B A Skill that saves her brand voice instructions

C A better chat prompt each time

D Custom Instructions for one-time setup

SCENARIO

Ahmed is an accountant who manually downloads Excel files from Google Drive and uploads them to Claude every month before asking for analysis. This copy-paste workflow takes 30 minutes of setup time.

2 What feature would eliminate Ahmed's manual file upload process?

- A A Skill to format his reports
- B A Connector linked to Google Drive
- C A Project workspace
- D Better prompting technique

SCENARIO

Dr. Kamran always tells Claude at the start of each consultation: "Convert my notes to SOAP format, pull allergies to the top, use consistent headings." He has to type this every single time.

3 In the kitchen analogy used in Module 7, a Skill is best described as:

- A An order shouted across the counter
- B The kitchen itself with all tools
- C A recipe card pinned to the wall
- D The ingredients in the pantry

SCENARIO

Zara needs Claude to access her Slack messages and Notion workspace to summarize her team's weekly updates. She wants AI to reach into these apps directly.

4 In the Module 7 kitchen analogy, what does a Connector represent?

- A A recipe card with instructions
- B An order placed by the customer
- C The kitchen itself — stove, knives, pantry, ingredients
- D The chef's personal training

SCENARIO

A team wants to understand the fundamental difference between a Skill and a Connector before deciding which one to set up first.

5 Which statement correctly distinguishes a Skill from a Connector?

- A Skills access external apps; Connectors store instructions
- B Skills save reusable how-to instructions; Connectors give AI safe access to your apps
- C Skills are for coders only; Connectors are for everyone
- D Skills are permanent; Connectors are temporary

SCENARIO

Bilal asks: "When I set up a Connector to my Google Drive, does Claude automatically get access to everything in my account permanently?"

6 How do Connectors handle permissions when accessing your apps?

- A AI gets full admin access permanently

- B** AI inherits your existing permissions; you choose read-only or read-write; activated per conversation
- C** AI creates a separate account with its own permissions
- D** Connectors only work with write permissions, never read-only

SCENARIO

Hina is deciding between setting up a Skill or a Connector. Her main frustration is: "I keep re-explaining how I want my design review notes structured every time."

7 According to Module 7's diagnostic framework, what is Hina's "trigger test" telling her?

- A** She needs a Connector to her design tools
- B** She needs a Skill — "I keep re-explaining how" is the Skill trigger
- C** She needs better one-off prompting
- D** She needs a Project workspace

SCENARIO

Omar's team debates: should they use Skills, Connectors, Projects, or Custom Instructions for storing company-wide style guidelines that apply to every single chat anyone has?

8 Which feature is BEST for global style preferences that should apply to every chat, always?

- A** A Skill
- B** A Connector

C Custom Instructions

D A Project

SCENARIO

Fatima notices that she has both problems: she keeps re-explaining her monthly report format AND she keeps copy-pasting data from her project management tool.

9 What combination does Fatima need based on the Module 7 diagnostic framework?

A Only a Skill

B Only a Connector

C Both a Skill and a Connector

D Neither — just better prompting

SCENARIO

Raza is setting up connectors and wonders: "Should I enable all my connectors globally so they're always available no matter what I'm doing?"

10 What is the recommended best practice for enabling Connectors?

A Enable all connectors globally for maximum convenience

B Enable connectors per conversation, not globally

C Enable connectors only for paid plans

D Enable connectors permanently after first use

SCENARIO

A teacher wants to build monthly lesson plans using syllabus documents stored in Google Drive AND wants AI to always follow her specific lesson plan structure (objectives, activities, assessment).

11 In the accountant's monthly close example from Module 7, what is the correct order of the combined Skills + Connectors workflow?

- A** Skill formats first → Connector fetches data → Output
- B** Connector fetches real data → Skill shapes it your way → Output
- C** User uploads data → Skill activates → Connector stores result
- D** Connector and Skill run simultaneously with no order

SCENARIO

Usman needs a one-time answer about capital cities of countries. He's wondering whether to set up a Skill, Connector, or just ask Claude directly.

12 According to the Module 7 diagnostic framework, what should Usman do for a one-off answer?

- A** Build a Skill for geography questions
- B** Connect a geography database
- C** Neither — just use good prompting for one-off answers
- D** Set up a Project with geography files

Part 2 — Using Existing Skills & Connectors (Q13–Q25)

SCENARIO

Nadia wants to use Claude to create PowerPoint presentations and Excel spreadsheets with formulas directly. She doesn't know if she needs to install anything special.

13 To enable built-in file creation skills (Word, PowerPoint, Excel, PDF), what must Nadia do in Claude settings?

- A** Purchase a premium skill from the marketplace
- B** Enable "Code execution and file creation" in Settings → Capabilities
- C** Install Microsoft Office connector first
- D** These skills cannot be used without coding knowledge

SCENARIO

Tariq wants to browse and install ready-made skills in Claude.ai. He's not sure where to find the skills directory.

14 How can Tariq browse and install skills from the official directory in Claude.ai?

- A** Go to Settings → Advanced → Skills Library
- B** Click "+" menu → Browse skills
- C** Skills can only be installed via command line
- D** Email Anthropic to request skill installation

SCENARIO

Sana wants to connect Claude to her Gmail and Slack. She sees options in the Connectors panel but is unsure what the standard installation steps are.

15 What is the standard Connector installation flow in Claude.ai?

- A** Download connector app → Install locally → Link to Claude
- B** Click "+" → Hover Connectors → Manage connectors → Click "+" beside Connectors → Pick service → Authorize
- C** Ask Claude to install the connector through chat
- D** Copy API keys manually into Claude settings

SCENARIO

Khalid is on a free Claude plan and wants to know how many custom connectors he can set up without upgrading.

16 How many custom connectors are included in the free Claude plan?

- A** Zero — connectors require paid plan
- B** One custom connector
- C** Five custom connectors
- D** Unlimited custom connectors

SCENARIO

Amna sees a connector in the directory labeled with an "Interactive" badge. She wants to know what this means before installing it.

17 What does the "Interactive" badge on a Connector indicate?

- A** The connector requires manual approval for each action
- B** The connector renders live dashboards within the conversation
- C** The connector supports two-way real-time messaging
- D** The connector is in beta testing mode

SCENARIO

Ali wonders how Claude knows WHEN to automatically use a Skill he installed. He didn't type any slash command but Claude used it anyway.

18 How does Claude.ai decide when to automatically activate a Skill?

- A** Claude activates all installed skills for every conversation
- B** Claude checks the request against skill descriptions and loads matching ones automatically
- C** User must always use slash commands to trigger skills
- D** Skills only activate when explicitly named in the prompt

SCENARIO

Mehreen installed a skill but Claude didn't use it when she expected. She wants to force Claude to use her "brand-voice" skill specifically.

19 What is the recommended way to force a specific skill to activate in Claude.ai?

- A** Reinstall the skill

B Name the skill plainly in your message: "use my brand-voice skill"

C Contact Anthropic support

D Delete and recreate the skill

SCENARIO

In Cowork and Microsoft 365 add-ins, a user wants to browse and explicitly pick a specific skill from a list rather than letting Claude auto-detect it.

20 In which surfaces do slash commands (/) appear for browsing and picking skills explicitly?

A Only in Claude.ai web interface

B Cowork/Microsoft 365 add-ins and Claude Code/OpenCode

C Only in mobile apps

D Only in enterprise paid plans

SCENARIO

A company's accountant describes her new workflow after setting up Skills and Connectors: "I just say 'Prepare the March client summary' and it's done in 2 minutes instead of 2 hours."

21 In the accountant's monthly close example, what does the Connector specifically do?

A Formats the amounts and groups expenses by head

B Retrieves the ledger from Google Drive

C Sends the final report to the client

D Approves the financial summary

SCENARIO

In the same accountant example, Claude groups expenses by head, flags withholding payments, and outputs in a four-section template — all automatically.

22 In the accountant's monthly close example, what does the Skill specifically do?

A Downloads the ledger file from Google Drive

B Shapes and formats the retrieved data according to the accountant's rules

C Sends emails to clients automatically

D Creates a Google Drive folder for storage

SCENARIO

Hassan has multiple connectors installed and wants to control how they load when he opens a conversation with many connectors active.

23 What setting controls how multiple Connectors load in a conversation?

A Connector Priority Queue

B Tool access setting

C Bandwidth Limiter

D Multi-Connector Mode toggle

SCENARIO

A student asks: "Why does Claude only load short skill summaries instead of the full skill instructions when I start a conversation?"

24 What is "progressive disclosure" in the context of Skills?

- A** Skills reveal their price gradually before purchase
- B** AI keeps only short summaries loaded; opens full instructions only when a skill is matched
- C** Skills become more powerful the more you use them
- D** Skills are disclosed to users progressively based on their subscription tier

SCENARIO

A marketer has set up her brand voice skill but Claude only follows it 60% of the time. Other times it ignores the skill entirely.

25 What is the MOST likely cause of a Skill not activating reliably?

- A** The skill file is too large
- B** Poor description field — vague descriptions cause activation failures
- C** The user needs a paid plan for reliable activation
- D** Claude.ai has a known bug with marketing skills

Part 3 — Building Your Own Skills (Q26–Q38)

SCENARIO

Rabia is not a programmer but wants to create her own custom skill for summarizing student feedback. She's worried she'll need to write code.

26 Which tool enables non-programmers to build Skills through conversation in plain English?

- A** The Claude API playground
- B** The skill-creator tool
- C** VS Code extension for Claude
- D** The Anthropic developer console
